REGULAR PAPERS
Risk-Sensitive Linear Control for Systems With Stochastic Parameters ................................. Y. Ito, K. Fujimoto, Y. Tadokoro, and T. Yoshimura 1328
Cooperative–Competitive Multiagent Systems for Distributed Minimax Optimization Subject to Bounded Constraints S. Yang, J. Wang, and Q. Liu 1358
Nash and Wardrop Equilibria in Aggregative Games With Coupling Constraints D. Paccagnan, B. Gentile, F. Parise, M. Kamgarpour, and J. Lygeros 1373
Scaling Laws for Consensus Protocols Subject to Noise A. Jadbabaie and A. Olshevsky 1389
Two Approaches for the Stabilization of Nonlinear KdV Equation With Boundary Time-Delay Feedback L. Baudouin, E. Crépeau, and J. Valein 1403
Feedback Stabilization of a 1-D Linear Reaction–Diffusion Equation With Delay Boundary Control C. Prieur and E. Trélat 1415
Learning Generalized Nash Equilibria in a Class of Convex Games T. Tatarenko and M. Kamgarpour 1426
Equilibrium-Independent Dissipativity With Quadratic Supply Rates J. W. Simpson-Porco 1440
New Approach to General Nonlinear Discrete-Time Stochastic $H_{\infty}$ Control X. Lin, T. Zhang, W. Zhang, and B.-S. Chen 1472
Unscented Kalman Filters for Riemannian State-Space Systems H. M. T. Menegaz, J. Y. Ishihara, and H. T. M. Kussaba 1487
Risk-Sensitive Zero-Sum Differential Games J. Moon, T. E. Duncan, and T. Başar 1503
Optimal Remote Estimation of Discrete Random Variables Over the Collision Channel M. M. Vasconcelos and N. C. Martins 1519
On the SPRification of Linear Descriptor Systems via Output Feedback M. Corless, E. Zeheb, and R. Shorten 1535
The Weighted Nearest Neighbor Estimate for Hammerstein System Identification W. Greblicki and M. Pawlak 1550

**CORRECTION**

Corrections to “On the Decidability and Complexity of Diagnosability for Labeled Petri Nets” | X. Yin and S. Lafortune | 1768 |
PAPERS

Stochastic Robust Simulation and Stability Properties of Chemical Reaction Networks ........................................ C. Possier and A. R. Teel 2
Leader-Following Synchronization of Coupled Homogeneous and Heterogeneous Harmonic Oscillators Based on Relative Position Measurements .................................................. Q. Song, F. Liu, J. Cao, A. V. Vasilakos, and Y. Tang 13
Risk-Averse Access Point Selection in Wireless Communication Networks ........................................................... W.-J. Ma, C. Oh, Y. Liu, D. Dentscheva, and M. M. Zavlanos 24
Differentially Private Consensus With an Event-Triggered Mechanism ................................................................. L. Gao, S. Deng, and W. Ren 60
Attractor Stabilizability of Boolean Networks With Application to Biomolecular Regulatory Networks ....................... M. R. Rafimanzelat and F. Bahrani 72
Distributed Algorithm to Solve a System of Linear Equations With Unique or Multiple Solutions From Arbitrary Initializations ................................................................. P. Wang, W. Ren, and Z. Duan 82
Geometric Analysis of Estimability of Target Object Shape Using Location-Unknown Distance Sensors ................ H. Saito and H. Honda 94
Time-Scale Separation in Networks: State-Dependent Graphs and Consensus Tracking ........................................ A. Awad, A. Chapman, E. Schoof, A. Narang-Siddarth, and M. Mesbahi 104
Analysis, Control, and Evaluation of Mobility-on-Demand Systems: A Queueing-Theoretical Approach ................... R. Zhang, F. Rossi, and M. Pavone 115
Achieving Robust Average Consensus Over Lossy Wireless Networks ................................................................. F. Acciani, P. Frasca, G. Heijenk, and A. A. Stoorvogel 127
Optimal Auction Design for Flexible Consumers ................................................................................................. S. Navabi and A. Nayyar 138

(Contents continued on Page 1)
Bayesian Filtering With Unknown Sensor Measurement Losses ........................................ J. Zhang, K. You, and L. Xie 163
Controlling Directed Networks With Evolving Topologies ........................................ G. Li, J. Ding, C. Wen, L. Wang, and F. Guo 176
A Resistance-Distance-Based Approach for Optimal Leader Selection in Noisy Consensus Networks ................................................................. S. Patterson, Y. Yi, and Z. Zhang 191
Influence of Conformist and Manipulative Behaviors on Public Opinion .................. S. R. Etesami, S. Bolouki, A. Nedić, T. Başar, and H. V. Poor 202
Verification and Dynamics of Group-Based Potential Games ................................ C. Li, F. He, T. Liu, and D. Cheng 215
Connectivity of Wireless Sensor Networks Secured by Heterogeneous Key Predistribution Under an On/Off Channel Model ...................................................... R. Eletreby and O. Yağan 225
Finite-Time Connectivity-Preserving Consensus for Second-Order Nonlinear Multiagent Systems ................................................................. H. Hong, W. Yu, J. Fu, and X. Yu 236
Retail and Wholesale Electricity Pricing Considering Electric Vehicle Mobility ........ M. Alizadeh, H.-T. Wai, A. Goldsmith, and A. Scaglione 249
On the Structural Perspective of Computational Effectiveness for Quantized Consensus in Layered UAV Networks ................................................................. Y. Wan, J. Yan, Z. Lin, V. Sheth, and S. K. Das 276
Robust Global Synchronization of Brockett Oscillators ........................................... H. Ahmed, R. Ushirobira, and D. Efimov 289
Distributed Generalized Nash Equilibria Computation of Monotone Games via Double-Layer Preconditioned Proximal-Point Algorithms ............................... P. Yi and L. Pavel 299
Minimal Edge Addition for Network Controllability ............................................... X. Chen, S. Pequito, G. J. Pappas, and V. M. Preciado 312
Adaptive Leader Following in Networks of Discrete-Time Dynamical Systems: Algorithms and Global Convergence Analysis ........................................... M. S. Radenković and M. Krstić 324
Attack-Resilient Pulse-Coupled Synchronization ...................................................... Z. Wang and Y. Wang 338
Structured Decentralized Control of Positive Systems With Applications to Combination Drug Therapy and Leader Selection in Directed Networks ................. N. K. Dhingra, M. Colombino, and M. R. Jovanović 352
Demand Shaping in Cellular Networks .................................................................... X. Zhou and L. Chen 363
Robustness of Synchronization to Additive Noise: How Vulnerability Depends on Dynamics ............................................................................................. M. Porfiri and M. Frasca 375
Cooperative Semiglobal Robust Output Regulation of Non-Introspective Nonlinear Agents With Partial Normal Form and State-Dependent High-Frequency Gain ............................................. L. Wang, C. Wen, and H. Su 388
A Microscopic Model for Lane-Less Traffic ......................................................... A. K. Mulla, A. Joshi, R. Chavan, D. Chakraborty, and D. Manjunath 415
Classification of the Structurally Controllable Zero-Patterns for Driftless Bilinear Control Systems ....................................................................................... A. Tsopelakos, M.-A. Belabbas, and B. Gharesifard 429
Security Against Impersonation Attacks in Distributed Systems ......................... P. N. Brown, H. P. Borowski, and J. R. Marden 440
EXPOSE the Line Failures Following a Cyber-Physical Attack on the Power Grid ........ S. Sohtan and G. Zussman 451
GUEST EDITORIAL
Editorial to the Special Issue of L-CSS on Control and Network Theory for Biological Systems .......... ............................................................... M. Arcak, F. Blanchini, and M. Vidyasagar 228

SPECIAL ISSUE PAPERS
Postprandial Glucose Regulation via KNN Meal Classification in Type 1 Diabetes ......................... E. M. Aiello, C. Toffanin, M. Messori, C. Cobelli, and L. Magni 230
A Singular Singular Perturbation Problem Arising From a Class of Biomolecular Feedback Controllers ...... Y. Qian and D. Del Vecchio 236
Dynamic Density Estimation in Heterogeneous Cell Populations ............ A. Küper, R. Dürr, and S. Waldherr 242
Modeling Enzyme Controlled Metabolic Networks in Rapidly Changing Environments by Robust Optimization .............................................................................. H. Lindhorst, S. Lucia, R. Findeisen, and S. Waldherr 248
Evolutionary Dynamics of Two Communities Under Environmental Feedback ..................................... Y. Kawano, L. Gong, B. D. O. Anderson, and M. Cao 254
BDC-Decomposition for Global Influence Analysis ........................................ F. Blanchini and G. Giordano 260
Robustness Analysis of a Synthetic Translational Resource Allocation Controller .......................... A. P. S. Darlington, J. Kim, and D. G. Bates 266
Input-Dependent Structural Identifiability of Nonlinear Systems ........................................ A. F. Villaverde, N. D. Evans, M. J. Chappell, and J. R. Banga 272
Analysis and Control of Genetic Toggle Switches Subject to Periodic Multi-Input Stimulation ............... D. Fiore, A. Guarino, and M. di Bernardo 278
A Linear Formulation of Asynchronous Boolean Networks ............. H. Das, A. Deshpande, and R. K. Layek 284
Bounding Transient Moments of Stochastic Chemical Reactions .................................. Y. Sakurai and Y. Hori 290
Ensemble Controllability of Cellular Oscillators ................................ K. Kuritz, S. Zeng, and F. Allgöwer 296
Analysis of a Minimal Gene Regulatory Network for Cell Differentiation ........................................ I. Zorzan, S. Del Favero, B. Di Camillo, and L. Schenato 302
Sharing Resources Can Lead to Monostability in a Network of Bistable Toggle Switches ............ A. Gyorgy 308

The Four P’s of Research

MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, IEEE Control Systems Magazine publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems Magazine encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education.

IEEE Control Systems Magazine publishes a variety of columns. “Applications of Control” columns are industrially oriented summaries of innovations in control technology. “Focus on Education” typically describes some aspect of education such as novel control experiments. “Lecture Notes” can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://www.ieeecss.org/publications/cms/submissions. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the IEEE Control Systems Magazine website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content emailed to jhow@mit.edu.

SPECIAL ISSUES: IEEE Control Systems Magazine encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about recently published books to the associate editor for book reviews. Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: IEEE Control Systems Magazine accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.

IEEE CONTROL SYSTEMS MAGAZINE—(ISSN 1066-033X) (ISMAD7) is published bimonthly by The Institute of Electrical and Electronics Engineers, Inc. Headquarters: 3 Park Avenue, 17th Floor, New York, NY 10016-5997, U.S.A. +1 212 416 7900. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. The is a membership benefit of the IEEE Control Systems Society; and subscriptions are US$4.00 per member per year (included in Society fee). Replacement copies for members are available for US$20.00 (one copy only). Nonmembers can purchase individual copies for US$109.00. Nonmember subscription prices are available on request. Copyright and Reprint Permissions: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limits of the U.S. Copyright law for private use of patrons: 1) those post-1977 articles that carry a code at the bottom of the first page, provided the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, U.S.A. and 2) pre-1978 articles without fee. For other copying, reprint, or republication permission, write to: Copyrights and Permissions Department, IEEE Service Center, 445 Hoes Lane, Piscataway NJ 08854, U.S.A. Copyright © 2019 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals postage paid at New York, NY, and at additional mailing offices.
