REGULAR PAPERS

Optimal Multivehicle Motion Planning Using Bernstein Approximants ................................................. V. Cichella, I. Kaminer, C. Walton, N. Hovakimyan, and A. M. Pascoal 1453
LQG Control and Sensing Co-Design ................................. V. Tsoumas, L. Carlone, G. J. Pappas, and A. Jadbabaie 1468
Multiagent Fully Decentralized Value Function Learning With Linear Convergence Rates ...................... L. Cassano, K. Yuan, and A. H. Sayed 1497
Social Optima in Robust Mean Field LQG Control: From Finite to Infinite Horizon ................................... B.-C. Wang, J. Huang, and J.-F. Zhang 1529
\( F \)-Passive Systems and Control Application ................................................................. J. D. Stefanovski 1545
PI Regulation of a Reaction–Diffusion Equation With Delayed Boundary Control ................................... H. Lhachemi, C. Prieur, and E. Trélat 1573
Distortion-Based Lightweight Security for Cyber-Physical Systems ............................................................. G. K. Agarwal, M. Karmoose, S. Diggavi, C. Fragouli, and P. Tabuada 1588
Extensions of the Dynamic Programming Framework: Battery Scheduling, Demand Charges, and Renewable Integration ...................................................... M. Jones and M. M. Peet 1602
An Algorithm to Compute the Inverse Image of a Point With Respect to a Nondeterministic Max-Plus Linear System ......................................................................................... R. M. F. Cândido, L. Hardouin, M. Lhommeau, and R. S. Mendes 1618
On Approximate Opacity of Cyber-Physical Systems .................................................................................. X. Yin, M. Zamani, and S. Liu 1630
On Adversary Robust Consensus Protocols Through Joint-Agent Interactions ........................................ D. Angeli and S. Manfredi 1646
Persistence of Delayed Complex Balanced Chemical Reaction Networks .................................................. X. Zhang and C. Gao 1658
Adaptive Event-Triggered Consensus of Multiagent Systems on Directed Graphs ........................................ X. Li, Z. Sun, Y. Tang, and H. R. Karimi 1670
Deterministic and Randomized Actuator Scheduling With Guaranteed Performance Bounds ................. M. Siami, A. Olshevsky, and A. Jadbabaie 1686
Data-Driven Model Predictive Control With Stability and Robustness Guarantees ..................................... J. Berberich, J. Köhler, M. A. Müller, and F. Allgöwer 1702

TECHNICAL NOTES

(Contents Continued on Back Cover)
Optimal Output Consensus for Nonlinear Multiagent Systems With Both Static and Dynamic Uncertainties ................................. Y. Tang and X. Wang 1733
Classification for Dynamical Systems: Model-Based and Data-Driven Approaches ......................................................... G. Battistelli and P. Tesi 1741
Model Reference DSMC With a Relative Degree Two Switching Variable ................................................................. P. Latosinski and A. Bartoszewicz 1749
Moving-Horizon Estimation for Linear Dynamic Networks With Binary Encoding Schemes ................................................... Q. Liu and Z. Wang 1763
Extension of State Space and Lyapunov Matrices ........................................................................................................ A. N. Aliseyko 1771
Optimal Infinite Horizon Decentralized Networked Controllers With Unreliable Communication ................................................................. Y. Ouyang, S. M. Asghari, and A. Nayyar 1778
Variational Adaptive Kalman Filter With Gaussian-Inverse-Wishart Mixture Distribution .............................................. Y. Huang, Y. Zhang, P. Shi, and J. Chambers 1786
Worst-Case Guarantees for Remote Estimation of an Uncertain Source ........................................................................................................ M. Gagrani, Y. Ouyang, M. Rasouli, and A. Nayyar 1794
Optimism-Based Adaptive Regulation of Linear-Quadratic Systems ........................................................................................................ M. K. S. Faradonbeh, A. Tewari, and G. Michailidis 1802
Adaptive Rational Orthogonal Basis Functions for Identification of Continuous-Time Systems ................................................................. W. Mi and W. X. Zheng 1809
Algebraic Necessary and Sufficient Conditions for Testing Stability of 2-D Linear Systems ................................................................. V. Krishnan and S. Martinez 1825
Distributed Nash Equilibrium Seeking With Limited Cost Function Knowledge via a Consensus-Based Gradient-Free Method ................................................. Y. Pang and G. Hu 1832
Online Stochastic Optimization With Time-Varying Distributions ........................................................................................ X. Cao, J. Zhang, and H. V. Poor 1840
Global Practical Tracking Via Adaptive Output Feedback for Uncertain Nonlinear Systems Without Polynomial Constraint ................................................................. Y. Wang and Y. Liu 1848
Policy Evaluation in Continuous MDPs With Efficient Kernelized Gradient Temporal Difference ................................................................. A. Koppel, G. Warnell, E. Stump, P. Stone, and A. Ribeiro 1856
A Second-Order Proximal Algorithm for Consensus Optimization ........................................................................................ X. Wu, Z. Qu, and J. Lu 1864
Analytic Expressions in Stochastic Max-Plus-Linear Algebra and their Application in Model Predictive Control ................................................................. T. J. J. vanden Boom and B. De Schutter 1872
Robust Stability of Barrier-Based Model Predictive Control ............................................................................................................... P. Petsagkourakis, W. P. Heath, J. Carrasco, and C. Theodoropoulos 1879
Mean-Square Consentability of Multiagent Systems With Nonidentical Channel Fading ............................................................. J. Xu, Z. Zhang, and W. Wang 1887
Optimal Multiplexing of Discrete-Time Constrained Control Systems on Matrix Lie Groups ................................................................. C. Maheshwari, S. Srikant, and D. Chatterjee 1895
Distributed Integer Balancing Under Weight Constraints in the Presence of Transmission Delays ................................................................. A. I. Rikos and C. N. Hadjicostis 1910
Discrete-Time Distributed Observers Over Jointly Connected Switching Networks and an Application ................................................................. T. Liu and J. Huang 1918
Adaptive Leader–Follower Synchronization Over Heterogeneous and Uncertain Networks of Linear Systems Without Distributed Observer ........................................................................................................... I. A. Azzollini, W. Yu, S. Yuan, and S. Baldi 1925

On the Solution of the Optimal Power Flow for Three-Phase Radial Distribution Networks With Energy Storage
E. Stai, C. Wang, and J.-Y. Le Boudec 187
The Impact of Complex and Informed Adversarial Behavior in Graphical Coordination Games
K. Paarporn, B. Canty, P. N. Brown, M. Alizadeh, and J. R. Marden 200
Optimal Target Control of Complex Networks With Selectable Inputs
L. Gao, G. Zhao, G. Li, F. Guo, and F. Zeng 212
Controller and Triggering Mechanism Co-design for Control Over Time-Slotted Networks
S. Linsenmayer, B. W. Carabelli, S. Wildhagen, K. Rothermel, and F. Allgöwer 222
Synthetic Biology-Inspired Robust-Perfect-Adaptation-Achieving Control Systems: Model Reduction and Stability Analysis
A. M. Zand and M. S. Tavazoei 233
Dynamic Resilient Network Games With Applications to Multiagent Consensus
Y. Nugraha, A. Cetinkaya, T. Hayakawa, H. Ishii, and Q. Zhu 246
Feedback Stabilization of Uncertain Networked Control Systems Over Delayed and Fading Channels
C. Tan, H. Zhang, W. S. Wong, and Z. Zhang 260
Distributed Zero-Order Algorithms for Nonconvex Multiagent Optimization
Y. Tang, J. Zhang, and N. Li 269
Resilient Primal–Dual Optimization Algorithms for Distributed Resource Allocation
Randomized Constraints Consensus for Distributed Robust Mixed-Integer Programming
M. Chamanbaz, G. Notarstefano, F. Sasso, and R. Bouffanais 295
Distributed Automatic Load Frequency Control With Optimality in Power Systems
X. Chen, C. Zhao, and N. Li 307
Uniqueness of Power Flow Solutions Using Monotonicity and Network Topology
S. W. Park, R. Y. Zhang, J. Lavaei, and R. Baldick 319
Distributed Optimization Under Unbalanced Digraphs With Node Errors: Robustness of Surplus-Based Dual Averaging Algorithm
C.-X. Shi and G.-H. Yang 331
Fast Online Reinforcement Learning Control Using State-Space Dimensionality Reduction
T. Sadamoto, A. Chakrabortty, and J.-ichi Imura 342
Workspace Partitioning and Topology Discovery Algorithms for Heterogeneous Multiagent Networks
E. Bakolas 354
Global Distributed Attitude Tracking Control of Multiple Rigid Bodies via Quaternion-Based Hybrid Feedback
Y. Huang and Z. Meng 367
Admissibility of Uncertain Injections in Quadratic Algebraic Systems
C. Wang, E. Stai, and J.-Y. Le Boudec 379
Nonasymptotic Connectivity of Random Graphs and Their Unions
B. Bjorkman, M. Hale, T. D. Lamkin, B. Robinson, and C. Thompson 391
Set Invariance and Optimal Set Stabilization of Boolean Control Networks: A Graphical Approach

60 CONFERENCE REPORTS
2021 American Control Conference Preview

62 CONFERENCE CALENDAR

MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, IEEE Control Systems publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. IEEE Control Systems publishes a variety of columns. "Applications of Control" columns are industrially oriented summaries of innovations in control technology. "Focus on Education" typically describes some aspect of education such as novel control experiments. "Lecture Notes" can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://www.ieeecss.org/publications/csm/submissions. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the IEEE Control Systems website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content emailed to r.sepulchre@eng.cam.ac.uk.

SPECIAL ISSUES: IEEE Control Systems encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about recently published books to the associate editor for book reviews. Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: IEEE Control Systems accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.

IEEE CONTROL SYSTEMS—ISSN 1066-033X (ISMAC7) is published bimonthly by The Institute of Electrical and Electronics Engineers, Inc., Headquarters: 3 Park Avenue, 17th Floor, New York, NY 10016-5997, U.S.A. +1 212 419 7900. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. The is a membership benefit of the IEEE Control Systems Society, and subscriptions are US$4.00 per member per year (included in Society fee). Replacement copies for members are available for US$20.00 (one copy only). Nonmembers can purchase individual copies for US$118. Nonmember subscription prices are available on request. Copyright and Reprint Permissions: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limits of the U.S. Copyright law for private use of patrons: 1) those post-1977 articles that carry a code at the bottom of the first page, provided the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, U.S.A; and 2) pre-1978 articles without fee.
