## TABLE OF CONTENTS

### CSS Publications Activities

**Vice-President**

**ANDREW ALLEYNE**  
*University of Illinois at Urbana-Champaign*  
[http://ieeecss.org/publications](http://ieeecss.org/publications)

**Journal Editors**

**IEEE Transactions on Automatic Control**

**ALESSANDRO ASTOLFI**  
*Imperial College London and University of Rome “Tor Vergata”*  
[http://ieeecss.org/publication/transactions-automatic-control](http://ieeecss.org/publication/transactions-automatic-control)

**IEEE Transactions on Control Systems Technology**

**ANDREA SERRANI**  
*Ohio State University*  
[http://ieeecss.org/publication/transactions-control-systems-technology](http://ieeecss.org/publication/transactions-control-systems-technology)

**IEEE Transactions on Control of Network Systems**

**JEFF SHAMMA**  
*King Abdullah University of Science and Technology*  
**ANNA SCAGLIONE**  
*Deputy Editor-in-Chief Arizona State University*  

**IEEE Control Systems Letters**

**MARIA ELENA VALCHER**  
*University of Padua*  

**IEEE Control Systems Magazine**

**RODOLPHE SEPULCHRE**  
*University of Cambridge*  

**Electronics Editor**

**E-letter on Systems, Control and Signal Processing**

**AHMAD TAHA**  
*University of Texas at San Antonio*  
[http://ieeecss.org/publication/e-letter](http://ieeecss.org/publication/e-letter)

*Submission and editorial instructions can be found on each publication’s homepage*  
For subscription to the monthly E-Letter, please send an empty email to

**Contents Continued from Front Cover**

A Complete Characterization of Integral Input-to-State Stability and Its Small-Gain Theorem for Stochastic Systems ............................................. H. Ito 3039

**TECHNICAL NOTES**

Kernel-Based Simultaneous Parameter-State Estimation for Continuous-Time Systems ............................................................. P. Li, F. Boem, G. Pin, and T. Parisini 3053

Backstepping Control of Coupled Linear Parabolic PDEs With Space and Time Dependent Coefficients ............................. S. Kerschbaum and J. Deutscher 3060

On the Stability Analysis of Mixed Traffic With Vehicles Under Car-Following and Bilateral Control .................................................. L. Wang and B. K. P. Horn 3076

Necessary and Sufficient Conditions for $2\eta$th Moment Stability of Several Classes of Linear Stochastic Systems ................................. S. Luo and F. Deng 3084

Divergence Properties of Labeled Petri Nets and Their Relevance for Diagnosability Analysis ................................................................. S. Zuo, F. L. Lewis, and A. Davoudi 3104

A Modified Saddle-Point Dynamics for Distributed Convex Optimization on General Directed Graphs .......................................................... A. Giua, S. Lafortune, and C. Seatzu 3109

Resilient Output Containment of Heterogeneous Cooperative and Adversarial Multigroup Systems ................................................................. B. Touri and B. Gharesifard 3109

Asymptotic Behavior and Collision Avoidance in the Cucker–Smale Model ................................................................. X. Yin, D. Yue, and Z. Chen 3112

Event-Triggered Dynamic Output Feedback Control for Switched Systems With Frequent Asynchronism ...................................................... Z. Fei, C. Guan, and X. Zhao 3120

Fredholm Backstepping Control of Coupled Linear Parabolic PDEs With Input and Output Delays ................................................................. J. Deutscher and J. Gabriel 3128

Exponential Stability of a Schrödinger Equation Through Boundary Coupling a Wave Equation ................................................................. J.-M. Wang, F. Wang, and X.-D. Liu 3136

Nonlinear Filtering Method Using a Switching Error Model for Outlier-Contaminated Observations ........................................................ A. Nakabayashi and G. Ueno 3150

Structural Characterization of Linear Quantum Systems With Application to Back-Action Evading Measurement .................................................. G. Zhang, I. R. Petersen, and J. Li 3157

Quasi-Polynomial-Based Robust Stability of Time-Delay Systems Can be Less Conservative Than Lyapunov–Krasovskii Approaches ................................................................. S. Angulo, R. Márquez, and M. Bernal 3164

On the Existence of Block-Diagonal Solutions to Lyapunov and $H_{\infty}$ Riccati Inequalities ................................................................. A. Sootla, Y. Zheng, and A. Papachristodoulou 3170

Novel All-Pass Factorization, All Solutions to Rational Matrix Equation and Control Application ................................................................. J. Stefanovski 3176

Extremum Seeking Control With Input Dead-Zone ................................................................. G. Shao, A. R. Teel, Y. Tan, K.-Z. Liu, and R. Wang 3184

Risk Probability Minimization Problems for Continuous-Time Markov Decision Processes on Finite Horizon ................................................................. H. Huo and X. Guo 3199

A Reference Governor for Nonlinear Systems With Disturbance Inputs Based on Logarithmic Norms and Quadratic Programming ................................................................. N. Li, I. V. Kolmanovsky, and A. Girard 3207

Leader-Following Consensus for Linear Multiagent Systems via Asynchronous Sampled-Data Control ................................................................. W. Liu and J. Huang 3215

REGULAR PAPERS

Vision-Based Control for Fast 3-D Reconstruction With an Aerial Robot ................................................................................................................................. E. Cristofalo, E. Montijano, and M. Schwager 1189
Experimental Validation of String Stability for Connected Vehicles Subject to Information Delay ................................................................. W. B. Qin and G. Orosz 1203
Dynamics Analysis and Control of a Bird Scale Underactuated Flapping-Wing Vehicle ................................................................................................................................. G. He, T. Su, T. Jia, L. Zhao, and Q. Zhao 1233
Fuel Consumption Minimization, With Emissions Constraints, for Diesel Powered Cars ................................................................................................. G. Pease, D. Limebeer, and P. Fussey 1243
Mixed Data-Driven and Model-Based Robot Implicit Force Control: A Hierarchical Approach ................................................................................................. M. Parigi Polverini, S. Formentin, L. Merzagora, and P. Rocco 1258
Distributed Sliding Mode Control for Nonlinear Heterogeneous Platoon Systems With Positive Definite Topologies ................................................................. Y. Wu, S. E. Li, J. Cortés, and K. Poolla 1272
Energetically Passive Multi-Degree-of-Freedom Hydraulic Human Power Amplifier With Assistive Dynamics ................................................................................................. S. Lee, P. Y. Li, and F. Eskilsson 1296
In-Flight Estimation of the Aerodynamics of Tethered Wings for Airborne Wind Energy ................................................................................................................................. É. Schmidt, M. De Lellis C. de Oliveira, R. S. da Silva, L. Fagiano, and A. T. Neto 1309
CPG Control for Harmonic Motion of Assistive Robot With Human Motor Control Identification ................................................................................................. J. Zhao and T. Iwasaki 1323

(Contents Continued on Back Cover)
An Analytical and Numerical Sensitivity and Robustness Analysis of Wave Energy Control Systems ................................................................. J. V. Ringwood, A. Mérigaud, N. Faedo, and F. Fusco 1337

Battery Adaptive Observer for a Single-Particle Model With Intercalation-Induced Stress ................................................................. D. Zhang, S. Dey, L. D. Couto, and S. J. Moura 1363

Control of an Architectural Cable Net Geometry ............................................ Y. R. Stürz, M. Morari, and R. S. Smith 1378

Power Scheduling of Fuel Cell Cars in an Islanded Mode Microgrid With Private Driving Patterns .......................................................... F. Alavi, N. van de Wouw, and B. De Schutter 1393

Development of Robust Fractional-Order Reset Control ............................. L. Chen, N. Saikumar, and S. H. HosseinNia 1404

Dynamic Trajectory Generation and a Robust Controller to Intercept a Moving Ball in a Game Setting .............................................................. R. Prakash, L. Behera, S. Mohan, and S. Jagannathan 1418

Robust Regressor-Free Control of Rigid Robots Using Function Approximations ............................................................................................ D. Ebeigbe, T. Nguyen, H. Richter, and D. Simon 1433

Robust Model Predictive Control of Linear Systems With Predictable Disturbance With Application to Multiobjective Adaptive Cruise Control .......................................................... X. Lin and D. Görges 1460

Thermal Management for the Cabin of a Battery Electric Vehicle Considering Passengers’ Comfort .............................................................. S. Schaut and Ő. Sawodny 1476

Robust Model Predictive Control of Irrigation Systems With Active Uncertainty Learning and Data Analytics ............................................... C. Shang, W.-H. Chen, A. D. Stroock, and F. You 1493

Pinning-Based Switching Control of Cyber-Physical Supercapacitor Energy Storage Systems ............................................................... H. Li, J. Peng, J. He, Z. Huang, J. Wang, L. He, and J. Pan 1520

**BRIEF PAPERS**

Multivariable Iterative Learning Control Design Procedures: From Decentralized to Centralized, Illustrated on an Industrial Printer ................................................................................................................................. L. Blanken and T. Oomen 1534

Total Variable Decomposition Based on Sparse Cointegration Analysis for Distributed Monitoring of Nonstationary Industrial Processes .............................................................................................................. C. Zhao, H. Sun, and F. Tian 1542

Stochastic Spacecraft Trajectory Optimization With the Consideration of Chance Constraints ........................................................................ R. Chai, A. Savvaris, A. Tsourdos, S. Chai, and Y. Xia 1550

Energy Management Considering Unknown Dynamics Based on Extremum Seeking Control and Particle Swarm Optimization ......................................................................................................................... K. Ma, S. Hu, G. Hu, Y. Bai, J. Yang, C. Dou, and J. M. Guerrero 1560

Cooperative Optimal Collision Avoidance Laws for a Hybrid-Tailed Robotic Fish ....................................................................................................... V. Sunkara, A. Chakravarthy, X. Yi, W. Zuo, and Z. Chen 1569

Nonlinear Asymptotic Attitude Estimation Using Double GPS Receivers and Gyro .......................................................................................... A. Mohamad-Hasani, M. Namvar, and M.-J. Yazdanpanah 1579

Distributing Sequential Control for Manufacturing Automation Systems ......................................................................................................... A. Mohamad-Hasani, M. Namvar, and M.-J. Yazdanpanah 1579

A Spatiotemporal Estimation Framework for Real-World LIDAR Wind Speed Measurements ......................................................................................... J. Mercieca, P. Aram, B. L. Jones, and V. Kadirkamanathan 1595

Flocking and Target Interception Control for Formations of Nonholonomic Kinematic Agents .................................................................................. M. Khaleedyan, T. Liu, V. Fernandez-Kim, M. de Queiroz 1603

An Experimentally Validated Technique for the Real-Time Management of Wrist Singularities in Nonredundant Anthropomorphic Manipulators ............................................................................... C. Guarino Lo Bianco and M. Raineri 1611

**COMMENTS AND CORRECTIONS**

Comments on “Modular-Controller-Design-Based Fast Terminal Sliding Mode for Articulated Exoskeleton Systems” ................................................................................................................................. Y. Su, C. Zheng, and P. Mercorelli 1621
Physics-Based Freely Scalable Continuum Deformation for UAS Traffic Coordination ........................................... H. Rastgoftar and E. Atkins 532
Collision-Free Trajectory Design for 2-D Persistent Monitoring Using Second-Order Agents ...................................... Y.-W. Wang, M.-J. Zhao, W. Yang, N. Zhou, and C. G. Cassandras 545
Time Decision for Multi-Input and Multi-Output Networked Control Systems ........................................... C. Wang, Y. Tao, and L. Shi 558
A Mean Field Game Approach to Scheduling in Cellular Systems ............................................................................. M. Manjrekar, V. Ramaswamy, V. Reddyvari Raja, and S. Shakkottai 568
Information Propagation Over Networks With Antagonistic Interactions: The Equilibrium Analysis .............................. X. Lin, Q. Jiao, and L. Wang 592
Secondary Frequency Control With On–Off Load Side Participation in Power Networks ........................................ Y. Zheng, M. Kamgarpour, A. Sootla, and A. Papachristodoulou 614
Distributed Design for Decentralized Control Using Chordal Decomposition and ADMM ................................. A. Kasis, N. Monshizadeh, and I. Lestas 627
Consensus of Multiagent Systems Via Asynchronous Cloud Communication ........................................................... S. L. Bowman, C. Nowzari, and G. J. Pappas 638
Protection Placement for Power System State Estimation Measurement Data Integrity ........................................ K. C. Sou 648
Distributed Consensus for Multiple Lagrangian Systems With Parametric Uncertainties and External Disturbances Under Directed Graphs ................................................................. J. Mei 658
Estimating Loadability Region of Natural Gas System via Monotone Inner Polytope Sequence ................................. D. Wu, T. Nie, K. Turitsyn, and S. Blumsack 660
Target Control of Directed Networks based on Network Flow Problems ................................................................. G. Li, X. Chen, P. Tang, G. Xiao, C. Wen, and L. Shi 673
(Contents Continued on Page 531)
Distributed $l_1$-State-and-Fault Estimation for Multiagent Systems ......................................................................................................................... K. Hashimoto, M. S. Chong, and D. V. Dimarogonas 699
Optimal Scheduling of Water Distribution Systems ................................................................. M. K. Singh and V. Kekatos 711
Estimating the Frequency Coupling Matrix From Network Measurements .......................................................................................................................... A. Lesage-Landry, S. Chen, and J. A. Taylor 724
A Distributed Algorithm For Almost-Nash Equilibria of Average Aggregative Games With Coupling Constraints .............................................................................................................. F. Parise, B. Gentile, and J. Lygeros 770
Collective Behavior of Heterogeneous Agents in Uncertain Cooperation–Competition Networks: A Nussbaum-Type Function Based Approach ............................................................................... H.-X. Hu, G. Wen, and W. X. Zheng 783
Laplacian Controllability of Interconnected Graphs .................................................................................................................. S.-P. Hsu 797
Controllability of Directed Networked MIMO Systems With Heterogeneous Dynamics ........................................................................................................... L. Xiang, P. Wang, F. Chen, and G. Chen 807
Robust Stabilization of Input-Affine Nonlinear Systems Under Network Constraints ................................................................................................................... M. Ghodrat and H. J. Marquez 818
Optimal Distributed Convex Optimization on Slowly Time-Varying Graphs .............................................................................................................................. A. Rogozin, C. A. Uribe, A. V. Gasnikov, N. Malkovsky, and A. Nedić 829
Stochastic Defense Against Complex Grid Attacks ......................................................................... D. Bienstock and M. Escobar 842
Generic Controllability of Networks With Identical SISO Dynamical Nodes ......................................................................................................................... C. Commault and A. Kibangou 855
Consensus Over Activity-Driven Networks .......................................................................................... L. Zino, A. Rizzo, and M. Portori 866
Strongly Uncontrollable Network Topologies ...................................................................................... C. O. Aguilar 878
Relative Docking and Formation Control via Range and Odometry Measurements ............................................................................................................... K. Cao, Z. Qiu, and L. Xie 912
Relaxed Schrödinger Bridges and Robust Network Routing ........................................................................................................ Y. Chen, T. T. Georgiou, M. Pavon, and A. Tannenbaum 923
Distributed Submodular Minimization and Motion Planning Over Discrete State Space ......................................................................................................... H. Jaleel and J. S. Shamma 932
A Differential Game Approach to Decentralized Virus-Resistant Weight Adaptation Policy Over Complex Networks ........................................................................................................... Y. Huang and Q. Zhu 944
Fully Distributed Consensus Control for Linear Multiagent Systems: A Reduced-Order Adaptive Feedback Approach ........................................................................................................ X. Li, F. Liu, M. Buss, and S. Hirche 967
Motion Capability Analysis for Multiple Fixed-Wing UAV Formations With Speed and Heading Rate Constraints ........................................................................................................ Y. Wang, M. Shan, and D. Wang 977
Distributed Kalman Filtering Under Model Uncertainty ........................................................................ M. Zorzi 990
An Optimization-Based Cooperative Path-Following Framework for Multiple Robotic Vehicles ............................................................................................................. A. Alessandretti and A. P. Aguiar 1002
Security Against False Data-Injection Attack in Cyber-Physical Systems ......................................................................................................................... A. Chattopadhyay and U. Mitra 1015
Bayesian Graphical Games for Synchronization in Networks of Dynamical Systems ................................................................................................................. V. G. Lopez, Y. Wan, and F. L. Lewis 1028
PAPERS
Generalized Speedy Q-Learning ........................................ I. John, C. Kamanchi, and S. Bhatnagar 524
On-Line Permissive Supervisory Control of Discrete Event Systems for scLTL Specifications ........................................ A. Sakakibara and T. Ushio 530
Distributed Optimization Over Time-Varying Networks With Minimal Connectivity ................. X. Wu and J. Lu 536
Graphon-Based Sensitivity Analysis of SIS Epidemics ...................... R. Vizuete, P. Frasca, and F. Garin 542
RLC Circuits-Based Distributed Mirror Descent Method .................. Y. Yu and B. Açıkmeşe 548
Event-Based State Estimation With Multiplicative Measurement Noise and Correlated Additive Noises .............................................................. S. Challagundla, S. Chitraganti, and P. K. Wali 554
Min-Consensus for Heterogeneous Higher-Order Integrators Under Switching Digraph ............................................. B. Singh, A. Sen, and S. R. Sahoo 560
Opinion Dynamics With Topological Gossiping: Asynchronous Updates Under Limited Attention ................................................. W. S. Rossi and P. Frasca 566
On the Controllability of Matrix-Weighted Networks .................. L. Pan, H. Shao, M. Mesbahi, Y. Xi, and D. Li 572
Conditions for Feedback Linearization of Network Systems .............................. T. Menara, G. Baggio, D. S. Bassett, and F. Pasqualetti 578
An Efficient Algorithm for an $\ell_1/\ell_2$ Mixed Optimal Control Problem with a Box Constraint and Parallelization ........................................... M. Toyoda and M. Tanaka 584
Frequency Truncated Discrete-Time System Norm .................................. H. S. Shekhawat 590
Structural Controllability of Undirected Diffusive Networks With Vector-Weighted Edges .......................... Y. Zhang, Y. Xia, H. Gao, and G. Zhang 596
Asymmetric State Feedback for Linear Plants With Asymmetric Input Saturation .......................... S. Mariano, F. Blanchini, S. Formentin, and L. Zaccarian 608
Containment Using Incomplete Agent Information Over a Digraph ...... A. Sen, S. R. Sahoo, and M. Kothari 614
On the Differentiability of Projected Trajectories and the Robust Convergence of Non-Convex Anti-Windup Gradient Flows ........................................... A. Hauswirth, F. Dörfler, and A. Teel 620
Smooth Dynamics for Distributed Constrained Optimization With Heterogeneous Delays ................. M. Li, S. Yamashita, T. Hatanaka, and G. Chesi 626

(Contents Continued on Page ii)
Dynamic and Distributed Online Convex Optimization for Demand Response of Commercial Buildings

Global Convergence of Policy Gradient Algorithms for Indefinite Least Squares Stationary Optimal Control

A Hybrid Model of Opinion Dynamics With Memory-Based Connectivity

Optimal Control of Sampled Linear Systems With Control-Linear Noise

On a Relaxation of Time-Varying Actuator Placement

On Gain-Scheduled State-Feedback Controller Synthesis With Quadratic Stability Condition

Statistical Consistency of Set-Membership Estimator for Linear Systems

Fault-Tolerant Control of Discrete-Event Systems With Controllability Failures

Converging-Input Convergent-State and Related Properties of Time-Varying Impulsive Systems

A Safety-Certified Policy Iteration Algorithm for Control of Constrained Nonlinear Systems

Chance-Constrained Control With Lexicographic Deep Reinforcement Learning

Turnpike Properties in Discrete-Time Mixed-Integer Optimal Control

Distributed Fixed-Time Attitude Tracking Consensus for Rigid Spacecraft Systems Under Directed Graphs

Statistical Consistency of Set-Membership Estimator for Linear Systems

Fault-Tolerant Control of Discrete-Event Systems With Controllability Failures

Distributed Fixed-Time Attitude Tracking Consensus for Rigid Spacecraft Systems Under Directed Graphs

Turnpike Properties in Discrete-Time Mixed-Integer Optimal Control

GUEST EDITORIAL

Introduction to the Special Issue of the IEEE L-CSS on Learning and Control

SPECIAL ISSUE PAPERS

Augmenting MPC Schemes With Active Learning: Intuitive Tuning and Guaranteed Performance

Approximate Closed-Loop Robust Model Predictive Control With Guaranteed Stability and Constraint Satisfaction

Torque Vectoring for High-Performance Electric Vehicles: An Efficient MPC Calibration

Learning Precisely Timed Feedforward Control of the Sensor-Denied Inverted Pendulum

Learning Robustly Stabilizing Explicit Model Predictive Controllers: A Non-Regular Sampling Approach

Sparse Learning-Based Approximate Dynamic Programming With Barrier Constraints

On-Off Adversarially Robust Q-Learning

Chance-Constrained Control With Lexicographic Deep Reinforcement Learning

Reinforcement Learning of Control Policy for Linear Temporal Logic Specifications Using Limit-Deterministic Generalized Büchi Automata

Max-Plus Linear Approximations for Deterministic Continuous-State Markov Decision Processes

Event-Based Control for Online Training of Neural Networks

On the Linear Convergence Rate of the Distributed Block Proximal Method

Regret Lower Bounds for Unbiased Adaptive Control of Linear Quadratic Regulators

SPECIAL ISSUE ON LEARNING AND CONTROL

(Contents Continued from Page i)
American Control Conference
ACC 2020

July 1–3 (Online), Denver, Colorado, USA

Paper Submission Deadline:
September 23, 2019 (Passed)

Acceptance/Rejection Notice:
January 31, 2020

Final Manuscript Submission:
March 19, 2020 (Passed)

http://acc2020.a2c2.org/
Conference on
Control Technology and Applications
CCTA 2020
August 24–26 (Online), Montreal, Canada

Initial Submission Deadline:
October 27, 2019 (Passed)

Notification of Acceptance/Rejection:
April 26, 2020

Final Submission Due Date:
July 3, 2020

http://ccta2020.ieeecss.org/
Conference on Decision and Control

CDC 2020

December 8–11, Jeju Island, Republic of Korea

Initial Paper Submissions to L-CSS with CDC Option Due:
March 17, 2020 (Passed)

Invited Session Proposals Due:
March 24, 2020 (Passed)

Initial Paper Submissions Due:
March 31, 2020 (Passed)

Workshop Proposals Due:
May 1, 2020 (Passed)

Paper and Workshop Decision Notification:
mid-July, 2020

Accepted Papers Due:
September 10, 2020

http://cdc2020.ieeecss.org/
American Control Conference
ACC 2021
May 26–28, New Orleans, Louisiana, USA

Manuscript Submission Deadline
September 14, 2020

Acceptance/Rejection Notice
January 24, 2021

Final Manuscript Submission Deadline
March 15, 2021

http://acc2021.a2c2.org/
