REGULAR PAPERS
Stability and Instability in Saddle Point Dynamics—Part I ........................................... T. Holding and I. Lestas 2933
Stability and Instability in Saddle Point Dynamics Part II: The Subgradient Method .... T. Holding and I. Lestas 2945
Resource-Aware Exact Decentralized Optimization Using Event-Triggered Broadcasting .... C. Liu, H. Li, and Y. Shi 2961
Specification-Guided Verification and Abstraction Refinement of Mixed Monotone Stochastic Systems .................................................. M. Dutreix and S. Coogan 2975
Data-Driven Ambiguity Sets With Probabilistic Guarantees for Dynamic Processes .................................................. D. Boskos, J. Cortés, and S. Martínez 2991
In-Silico Proportional-Integral Moment Control of Stochastic Gene Expression ......... C. Briat and M. Khammash 3007
Emergent Behaviors of Cucker–Smale Flocks on Riemannian Manifolds ................. S.-Y. Ha, D. Kim, and F. W. Schlöder 3020
Robust Stabilization of a Class of Nonlinear Systems Controlled Over Communication Networks .................................................. G. Pin, G. Fenu, V. Casagrande, D. Zorzenon, and T. Parisini 3036
An Optimal Transport Formulation of the Ensemble Kalman Filter .......................... A. Taghvaei and P. G. Mehta 3052
Probabilistic Occupancy via Forward Stochastic Reachability for Markov Jump Affine Systems .................................................. A. P. Vinod and M. M. K. Oishi 3068
Synchronization and Multicluster Capabilities of Oscillatory Networks With Adaptive Coupling .................................................. P. Feketa, A. Schaum, and T. Meurer 3084
Formal Synthesis of Stochastic Systems via Control Barrier Certificates ................. P. Jagtap, S. Soudjani, and M. Zamani 3097
Generalized Energy Functions for a Class of Third-Order Nonlinear Dynamical Systems .................................................. L. F. Costa Alberto, D. S. Siqueira, N. G. Bretas, and H.-D. Chiang 3111
Constrained Cross-Entropy Method for Safe Reinforcement Learning ................. M. Wen and U. Topcu 3123
Computing Probabilistic Controlled Invariant Sets ................................................. Y. Gao, K. H. Johansson, and L. Xie 3138
Local Optimality of Almost Piecewise-Linear Quantizers for Witsenhausen’s Problem .... A. Ajorlou and A. Jadbabaie 3152
Structural Balance via Gradient Flows Over Signed Graphs ................................... P. A. Cisneros-Velarde, N. E. Friedkin, A. V. Proskurnikov, and F. Bullo 3169
Variable Selection According to Goodness of Fit in Nonparametric Nonlinear System Identification .................................................. C. Cheng and E.-W. Bai 3184

TECHNICAL NOTES
Synthesis of Maximally Permissive Supervisors for Nondeterministic Discrete Event Systems With Nondeterministic Specifications .................................................. S. Takai 3197
Characterizing Energy-Related Controllability of Composite Complex Networks via Graph Product .................................................. B. She, S. S. Mehta, E. Doucette, C. Ton, and Z. Kan 3205

(Contents Continued on Back Cover)
A Hybrid Dynamic Event-Triggered Approach to Consensus of Multiagent Systems With External Disturbances........................................... G. Zhao and C. Hua

3213

Positivity and Stability of Delayed Timescale-Type Differential-Difference Equations ................................................................. Q. Xiao, Z. Zeng, T. Huang, and F. L. Lewis

3221

Decentralized Adaptive Fault-Tolerant Control for a Class of Strong Interconnected Nonlinear Systems via Graph Theory ................................................................. H.-J. Ma and L.-X. Xu

3227

On Exponential Bistability of Equilibrium Profiles of Nonisothermal Axial Dispersion Tubular Reactors ................................................................. A. Hastir, J. J. Winkin, and D. Dochain

3235

3243

3251

Single-Timescale Distributed GNE Seeking for Aggregative Games Over Networks via Forward–Backward Operator Splitting .................................................................................. D. Gadgloy and L. Pavel

3259

Synchronization of Networked Harmonic Oscillators via Quantized Sampled Velocity Feedback ......................................................... J. Wang, J. Feng, Y. Lou, and G. Chen

3267

Probability-Guaranteed Envelope-Constrained Filtering for Nonlinear Systems Subject to Measurement Outliers ................................................................. L. Ma, Z. Wang, J. Hu, and Q.-L. Han

3274

A Full Bayesian Approach to Sparse Network Inference Using Heterogeneous Datasets ................................................................................................. J. Jin, Y. Yuan, and J. Gonçalves

3282

Motion Optimization for Musculoskeletal Dynamics: A Flatness-Based Polynomial Approach ................................................................. H. Richter and H. Warner

3289

Asymptotic Tracking of Second-Order Nonsmooth Feedback Stabilizable Unknown Systems With Prescribed Transient Response ................................................................. C. K. Verginis and D. V. Dimarogonas

3296

Distributed Output-Feedback Consensus Control of Multiagent Systems with Unknown Output Measurement Sensitivity ................................................................. K. Li, C.-C. Hua, X. You, and X.-P. Guan

3303

Tracking Performance Guarantees in the Presence of Quantization for Uncertain Nonlinear Systems ..................................................................................... L. N. Bikas and G. A. Rovithakis

3311

Stabilization of Distributed Parameter Systems With Delays in the Boundary Based on Predictors ................................................................. D. Liu, Q. Wang, and G. Xu

3317

Energy-Related Controllability of Signed Complex Networks With Laplacian Dynamics .................................................................................................................. B. She, S. Mehta, C. Ton, and Z. Kan

3325

Consensus of Heterogeneous Second-Order Nonlinear Uncertain Multiagent Systems Under Switching Networks ......................................................... M. Lu and L. Liu

3331

Regularized Transport Between Singular Covariance Matrices ................................................................................................................. V. Ciccone, Y. Chen, T. T. Georgiou, and M. Pavon

3339

Convergence Analysis of Sampled-Data ILC for Locally Lipschitz Continuous Nonlinear Nonaffine Systems With Nonrepetitive Uncertainties ................................................................. R. Chi, Y. Hui, C.-J. Chien, B. Huang, and Z. Hou

3347

3355

Globally Exponentially Convergent Continuous Observers for Velocity Bias and State for Invariant Kinematic Systems on Matrix Lie Groups .................................................................................................................. D. E. Chang

3363

Maneuvering and Robustness Issues in Undirected Displacement-Consensus-Based Formation Control ................................................................. H. García de Marina

3370

Output Feedback Constrained Regulation of Linear Systems via Controlled-Invariant Sets ................................................................................................................. T. A. Almeida and C. E. T. Dórea

3378

Approximation of the Constrained Joint Spectral Radius via Algebraic Lifting ................................................................................................................. X. Xu and B. Açıkmeşe

3386

Distributed Model Predictive Control and Optimization for Linear Systems With Global Constraints and Time-Varying Communication .................................................................................. B. Jin, H. Li, W. Yan, and M. Cao

3393

Parallel MPC for Linear Systems With Input Constraints ......................................................................................................................... Y. Jiang, J. Oravec, B. Houska, and M. Kvasnica

3401

On Integrating Uncertainty Estimator Into PI Control for a Class of Nonlinear Uncertain Systems ................................................................................................................. W. Xue, S. Chen, C. Zhao, Y. Huang, and J. Su

3409
Adaptive Pose Control for Spacecraft Proximity Operations With Prescribed Performance Under Spatial Motion Constraints .................................................................................................................. X. Shao, Q. Hu, and Y. Shi 1405
Aggregation and Control of a Heterogeneous Population of Solar Panels Over the Grid Frequency .............................................. A. Peruffo, E. Guiu, P. Panciatici, and A. Abate 1420
An Adaptive Frequency-Locked-Loop Approach for the Turbocharger Rotational Speed Estimation via Acoustic Measurements ........................................................................................................... G. Gagliardi, F. Tedesco, and A. Casavola 1437
Avalanche Victim Search via Robust Observers .......................................................................................................................... N. Mimmo, P. Bernard, and L. Marconi 1450
Compound-Fault Diagnosis of Rotating Machinery: A Fused Imbalance Learning Method ............................................................... J. Zhang, Q. Zhang, X. He, G. Sun, and D. Zhou 1462
Electric Satellite Station Keeping, Attitude Control, and Momentum Management by MPC .......................................................... R. J. Caverly, S. Di Cairano, and A. Weiss 1475
Energy Storage in Paraffin: A PDE Backstepping Experiment ........................................................................................................ S. Koga, M. Makihata, R. Chen, M. Krstic, and A. P. Pisano 1490
Fixed Switching Frequency Direct Model Predictive Control With Continuous and Discontinuous Modulation for Grid-Tied Converters With LCL Filters .......................................................... P. Karamanakos, M. Nahalparvari, and T. Geyer 1503
Fully Distributed Joint Localization and Target Tracking With Mobile Robot Networks ................................................................. P. Zhu and W. Ren 1519
Geometric Adaptive Control With Neural Networks for a Quadrotor in Wind Fields .......................................................... M. Bisheban and T. Lee 1533
Hierarchical Centralized/Decentralized Event-Triggered Control of Multiclass Traffic Networks .......................................................... C. Pasquale, S. Sacone, S. Siri, and A. Ferrara 1549
Human Multi-Robot Safe Interaction: A Trajectory Scaling Approach Based on Safety Assessment .......................................................... M. Lippi and A. Marino 1565

(Contents Continued on Back Cover)
Low-Complexity Fast Charging Strategies Based on Explicit Reference Governors for Li-Ion Battery Cells ................................................................. A. Goldar, R. Romagnoli, L. D. Couto, M. Nicotra, M. Kinnaert, and E. Garone 1597
Online Capacity Estimation for Lithium-Ion Battery Cells via an Electrochemical Model-Based Adaptive Interconnected Observer .......................................................... A. Allam and S. Onori 1636
Proportional–Integral–Derivative-Based Learning Control for High-Accuracy Repetitive Positioning of Frictional Motion Systems ........................................................................................................... L. Hazeleger, R. Beerens, and N. van de Wouw 1652
Reinforcement Learning-Based Approximate Optimal Control for Attitude Reorientation Under State Constraints .................................................................................................................. H. Dong, X. Zhao, and H. Yang 1664
Robust Hybrid Control of an Atomic Force Microscope for the Characterization of Interaction Force Regions at the Nanoscale ......................................................................................................................... J. Cailliez, M. Boudaoud, S. Liang, and S. Régnier 1689
Secure State Estimation Using Hybrid Homomorphic Encryption Scheme ................................................................................................................................. Z. Zhang, P. Cheng, J. Wu, and J. Chen 1704
Vehicle Speed and Gear Position Co-Optimization for Energy-Efficient Connected and Autonomous Vehicles ............................................................................................................................................. Y. Shao and Z. Sun 1721
Vibration Suppression for Coupled Wave PDEs in Deep-Sea Construction ................................................................................................................................. J. Wang and M. Krstic 1733

BRIEF PAPERS
A Novel Inertial-Visual Heading Determination System for Wheeled Mobile Robots ................................................................................................................................. W. Lv, Y. Kang, Y.-B. Zhao, Y. Wu, and W. X. Zheng 1758
Decomposition-Learning-Based Output Tracking to Simultaneous Hysteresis and Dynamics Control: High-Speed Large-Range Nanopositioning Example ................................................................................................................................. J. Liu, J. Wang, and Q. Zou 1775
Dynamic Decentralized Periodic Event-Triggered Control for Wireless Cyber–Physical Systems ................................................................................................................................. A. Fu and J. A. McCann 1783
Nonlinear Power Control of an Internal Combustion Engine Without Throttle Actuator ................................................................................................................................. A. Gerlach, F. von Haeseler, H. Rottengruber, and R. Leidhold 1799
Predictive Antiwindup Compensation for Repetitive Control Supporting Nanoscaning ................................................................................................................................. P. Yan, P. Liu, and H. Özbay 1807
Real-Time Optimal Torque Control of Interior Permanent Magnet Synchronous Motors Based on a Numerical Optimization Technique ....................................................................................................... K. Choi, Y. Kim, K.-S. Kim, and S.-K. Kim 1815
Recursive Gaussian Process-Based Adaptive Control, With Application to a Lighter-Than-Air Wind Energy System ................................................................................................................................. J. Deese and C. Vermillion 1823
Static Gain Estimation for Automatic Generation Control Systems From Historical Ramp Responses ................................................................................................................................. J. Wang, Z. Yang, M. Wei, S. Gao, and Y. Zhao 1831
