# TABLE OF CONTENTS

October 2019

CSS Publications Activities

**Vice-President**

**THOMAS PARISINI** *Imperial College London and University of Trieste*
http://ieeecss.org/publications

**Journal Editors**

**IEEE Transactions on Automatic Control**

**ALESSANDRO ASTOLFI** *Imperial College London and University of Rome “Tor Vergata”*
http://ieeecss.org/publication/transactions-automatic-control

**IEEE Transactions on Control Systems Technology**

**ANDREA SERRANI** *Ohio State University*
http://ieeecss.org/publication/transactions-control-systems-technology

**IEEE Transactions on Control of Network Systems**

**IOANNIS PASCHALIDIS** *Boston University*
**JEFF SHAMMA** Deputy Editor-in-Chief *King Abdullah University of Science and Technology*
http://ieeecss.org/publication/transactions-control-network-systems

**IEEE Control Systems Letters**

**MARIA ELENA VALCHER** *University of Padua*
http://ieeecss.org/publication/control-systems-letters

**IEEE Control Systems Magazine**

**JONATHAN HOW** *Massachusetts Institute of Technology*
http://ieeecss.org/publication/ieee-control-systems-magazine

**Electronics Editor**

**E-letter on Systems, Control and Signal Processing**

**AHMAD TAHA** *University of Texas at San Antonio*
http://ieeecss.org/publication/e-letter

*Submission and editorial instructions can be found on each publication’s homepage*

For subscription to the monthly E-Letter, please send an empty email to

REGULAR PAPERS

Robust Decentralized Secondary Frequency Control in Power Systems: Merits and Tradeoffs .......................... E. Weitenberg, Y. Jiang, C. Zhao, E. Mallada, C. De Persis, and F. Dörfler 3967

Distributed Newton Method for Large-Scale Consensus Optimization .. R. Tatunov, H. Bou-Ammar, and A. Jadbabaie 3983

ZONE: Zeroth-Order Nonconvex Multiagent Optimization Over Networks .. D. Hajinezhad, M. Hong, and A. Garcia 3995

Bia-Corrected Q-Learning With Multistate Extension .......................... D. Lee and W. B. Powell 4011

Exponential Stability of Nonlinear Systems With Delayed Impulses and Applications .......................... X. Li, S. Song, and J. Wu 4024

A New Randomized Block-Coordinate Primal-Dual Proximal Algorithm for Distributed Optimization .......................... P. Latafat, N. M. Freiris, and P. Patrinos 4050

Multinode Bilateral Control Model ........................................... L. Wang and B. K. P. Horn 4066

A System-Level Approach to Controller Synthesis ........................... Y.-S. Wang, N. Matni, and J. C. Doyle 4079

Temporal Logic Task Planning and Intermittent Connectivity Control of Mobile Robot Networks .......................... Y. Kantaros, M. Guo, and M. M. Zavlanos 4105

Robustness of the Adaptive Bellman –Ford Algorithm: Global Stability and Ultimate Bounds .......................... Y. Mo, S. Dasgupta, and J. Beal 4121

Thompson Sampling for Stochastic Control: The Continuous Parameter Case .......................... D. Banjević and M. J. Kim 4137

Minimum-Variance Recursive Filtering for Two-Dimensional Systems With Degraded Measurements: Boundedness and Monotonicity .................................. J. Liang, F. Wang, Z. Wang, and X. Liu 4153

TECHNICAL NOTES

Leader–Following Consensus of Multiple Uncertain Euler–Lagrange Systems With Unknown Dynamic Leader ........ M. Lu and L. Liu 4167

(Contents Continued on Back Cover)
A Bilevel Programming Approach to the Convergence Analysis of Control-Lyapunov Functions ........................................... W. Tang and P. Daoutidis 4174
Controllability of Nash Equilibrium in Game-Based Control Systems . R.-R. Zhang and L. Guo 4180
Globally Optimal State-Feedback LQG Control for Large-Scale Systems With Communication Delays and Correlated Subsystem Process Noises ........................................... Y. Wang, J. Xiong, and D. W. C. Ho 4196
Discrete Time Pontryagin Maximum Principle Under State-Action-Frequency Constraints ................................... P. Paruchuri and D. Chatterjee 4202
A Distributed Algorithm for Least Squares Solutions .................... X. Wang, J. Zhou, S. Mou, and M. J. Corless 4217
New Controllability Conditions for Networked, Identical LTI Systems ................................ Y. Hao, Z. Duan, G. Chen, and F. Wu 4223
Robust Fault Diagnosis of Stochastic Discrete Event Systems ........... X. Yin, J. Chen, Z. Li, and S. Li 4237
Existence of Nonimpulsive Unique Solution and Stability for Discrete-Time Linear Rectangular Descriptor Jump Systems ................................ J. Tian and S. Ma 4245
Comprehending Complexity: Data-Rate Constraints in Large-Scale Networks ................................................. A. S. Matveev, A. V. Proskurnikov, A. Pogromsky, and E. Fridman 4252
Dynamic Consensus Tracking of Uncertain Lagrangian Systems With a Switched Command Generator ............ H. Cai and G. Hu 4260
Dynamic Output Feedback Control of the Liouville Equation for Discrete-Time SISO Linear Systems .......................... E. Bakolas 4268
Event-Triggered Risk-Sensitive State Estimation for Hidden Markov Models .................................................. J. Xu, W. C. Ho, E. Li, W. Yang, and Y. Tang 4276
Distributed Time-Varying Output Formation Tracking for Heterogeneous Linear Multiagent Systems With a Nonautonomous Leader of Unknown Input ................. Y. Hua, X. Dong, G. Hu, Q. Li, and Z. Ren 4292
Lyapunov Conditions for Input-to-State Stability of Hybrid Systems With Memory .................................. W. Ren and J. Xiong 4307
Minimal Strongly Eventually Positive Realization for a Class of Externally Positive Systems ............................. J. Zheng, J.-G. Dong, and L. Xie 4314
Coordinated Tracking Control With Asynchronous Edge-Based Event-Triggered Communications ...................... B. Cheng and Z. Li 4321
Linear–Quadratic Mean-Field-Type Games: Jump–Diffusion Process With Regime Switching .............................. J. Barreiro-Gomez, T. E. Duncan, and H. Tembine 4329
Switching Tube-Based MPC: Characterization of Minimum Dwell-Time for Feasible and Robustly Stable Switching ........................................................................................................... B. A. H. Vicente and P. A. Trodden 4345
Verification of Fault-predictability in Labeled Petri Nets Using Predictor Graphs ........................................... D. You, S. Wang, and C. Seatzu 4353
Codiagnosability Analysis of Discrete-Event Systems Modeled by Weighted Automata ............................................. G. S. Viana, M. V. Moreira, and J. C. Basilio 4361
Opacity Enforcement Using Nondeterministic Publicly Known Edit Functions ................................ Y. Ji, X. Yin, and S. Lafortune 4369
Self-Tuned Mirror Descent Schemes for Smooth and Nonsmooth High-Dimensional Stochastic Optimization ........................ N. Majlesinasab, F. Yousefian, and A. Pourhabib 4377
A Sharp Bound on the $s$-$\text{Energy}$ and Its Applications to Averaging Systems ................................ B. Chazelle 4385
Distributed Kalman Filtering and Control Through Embedded Average Consensus Information Fusion ......................... S. P. Talebi and S. Werner 4396

No Switching Policy Is Optimal for a Positive Linear System With a Bottleneck Entrance ...........................................M. Sadeghi, M. A. Al-Radhawi, M. Margaliot, and E. D. Sontag 889
Vector Recovery for a Linear System Corrupted by Unknown Sparse Error Vectors With Applications to Secure State Estimation ..................................M. Zhang, S. Hui, M. R. Bell, and S. H. Żak 895
Cooperative Manipulation of an Unknown Payload With Concurrent Mass and Drag Force Estimation ..........................S. Thapa, R. V. Self, R. Kamalapurkar, and H. Bai 907
On a Two Cutters and Fugitive Ship Differential Game .........................................................................................................................M. Pachter and P. Wasz 913
Decentralized Control for Guaranteed Individual Costs in a Linear Multi-Agent System: A Satisfaction Equilibrium Approach .........................................................................................J. Veetaseveera, V. S. Varma, I. C. Morărescu, and J. Daafouz 918
Optimal Lyapunov-Based Reaching Time Bounds for the Super-Twisting Algorithm ..........................................................R. Seebre and M. Horn 924
Control Law Realification for the Feedback Stabilization of a Class of Diagonal Infinite-Dimensional Systems With Delay Boundary Control ..............................................................................................................H. Lhachemi, R. Shorten, and C. Prieur 930
Optimal Linear Exponential Quadratic Gaussian Estimation With Intermittent Observations ..........................................................J. Xu, X. Wu, and Y. Tang 936
A Convex Relaxation for Model Predictive Control of a Class of Hammerstein Systems ..............................................................T. L. Vincent, G. Tang, and P. Weddle 942
Saddle-Flow Dynamics for Distributed Feedback-Based Optimization ..................................................................................................................C.-Y. Chang, M. Colombino, J. Cortés, and E. Dall’Anese 948
A Graph-Theoretic Approach to the $H_{\infty}$ Performance of Leader–Follower Consensus on Directed Networks .................................................................................................M. Pirani, H. Sandberg, and K. H. Johansson 954
Kinetic-Potential Energy Shaping for Mechanical Systems With Applications to Tracking .....................................................................................................................................................J. Ferguson, A. Donaite, and R. H. Middleton 960
Systematic Design of Decentralized Algorithms for Consensus Optimization .............................................................................S. Han 966
Spatially Distributed Networked Sliding Mode Control .................................................................................................................................J. Ludwig, M. Steinberger, and M. Horn 972
Iterative Approximate Nonlinear Inference via Gaussian Message Passing on Factor Graphs ..................................................................................................................................................C. H. né Hoffmann, E. Petersen, and P. Rostalski 978
Resilient Control for Cyber-Physical Systems Subject to Replay Attacks ...........................................................................................................G. Franzè, F. Tedesco, and W. Lucia 984
On the Mixed-Integer Linear-Quadratic Optimal Control With Switching Cost ...............................................................................................A. De Marchi 990
Stabilization of Non-Linear Networked Control Systems Closed Over a Lossy WirelessHART Network ..................................................................................................................A. I. Maass and D. Nešić 996
Allocating Marketing Resources Over Social Networks: A Long-Term Analysis ..............................................................................................................V. S. Varma, S. Lasaulce, J. Moumthanyvong, and I.-C. Morărescu 1002
From Reference Model Selection to Controller Validation: Application to Loewner Data-Driven Control ......................................................................................P. Kergus, M. Olivi, C. Poussot-Vassal, and F. Demourant 1008
An Input–Output Parametrization of Stabilizing Controllers: Amidst Youla and System Level Synthesis .................................................................................................................................L. Furieri, Y. Zheng, A. Papachristodoulou, and M. Kamgarpour 1014
Simultaneous Estimation of State and Unknown Input With $l_{\infty}$ Guarantee on Error-Bounds for Fuzzy Descriptor Systems .........................................................................................................................................A.-T. Nguyen, T.-M. Guerra, and V. Campos 1020
The Effect of Uniform Quantization on Parameter Estimation of Compound Distributions .................................................................................................................................R. Seifullaev, S. Knorn, and A. Ahlén 1032
On Stability of Consensus Control of Discrete-Time Multi-Agent Systems by Multiple Pinning Agents ..................................................................................................................................................D. Xu and T. Ushio 1038
Model Predictive Control Design for Dynamical Systems Learned by Echo State Networks .................................................................................................................................L. B. Armenio, E. Terzi, M. Farina, and R. Scattolini 1044
A Symbolic Approach to the Self-Triggered Design for Networked Control Systems .................................................................................................................................K. Hashimoto, A. Saoud, M. Kishida, T. Ushio, and D. V. Dimarogonas 1050
Compositional Synthesis of Symbolic Models for Networks of Switched Systems . . A. Swikir and M. Zamani 1056
Globally Optimal Least-Squares ARMA Model Identification Is an Eigenvalue Problem ..........................................................C. Vermeersch and B. De Moor 1062
Active Perception and Control From Temporal Logic Specifications .................................................................................................................................R. R. da Silva, V. Kurtz, and H. Lin 1068
Toward Wireless Control in Industrial Process Automation
A case study at a paper mill
ANDERS AHLÉN, JOHAN ÅKERBERG, MARKUS ERIKSSON, ALF J. ISAKSSON, TAKUYA IWAKI, KARL HENRIK JOHANSSON, STEFFI KNORN, THOMAS LINDH, and HENRIK SANDBERG
A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. IEEE Control Systems Magazine encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education. IEEE Control Systems Magazine encourages submissions, both feature articles and columns, on all aspects of control system technology.

Conference on Decision and Control

CDC 2019

December 11–13, Nice, France

Invited Session Proposals Due:
March 7, 2019 (Passed)

Initial Paper Submissions Due:
March 15, 2019 (Passed)

Workshop Proposals Due:
May 2, 2019 (Passed)

Paper and Workshop Decision Notification:
Mid-July, 2019

Accepted Papers Due:
September 10, 2019 (Passed)

http://cdc2019.ieeecss.org/
American Control Conference
ACC 2020

July 1–3, Denver, Colorado, USA

Paper Submission Deadline:
September 23, 2019 (Passed)

Acceptance/Rejection Notice:
January 31, 2020

Final Manuscript Submission:
March 15, 2020

http://acc2020.a2c2.org/
Conference on Control Technology and Applications
CCTA 2020
August 24–26, Montreal, Canada

Initial Submission Deadline:
October 27, 2019

Notification of Acceptance/Rejection:
April 26, 2020

Final Submission Due Date:
May 21, 2020

http://ccta2020.ieeecss.org/
Conference on Decision and Control

CDC 2020

December 8–11, Jeju Island, Republic of Korea

Initial Paper Submissions to L-CSS with CDC Option Due:
March 3, 2020

Invited Session Proposals Due:
March 10, 2020

Initial Paper Submissions Due:
March 17, 2020

Workshop Proposals Due:
May 1, 2020

Paper and Workshop Decision Notification:
mid-July, 2020

Accepted Papers Due:
September 10, 2020

http://cdc2020.ieeecss.org/
