REGULAR PAPERS

Model Identification and Adaptive State Observation for a Class of Nonlinear Systems .......... M. Bin and L. Marconi 5621
Distributed Balancing Under Flow Constraints Over Arbitrary Communication Topologies ........................................... C. N. Hadjicostis and A. D. Domínguez-García 5637
Hamilton–Jacobi–Bellman Equation for Control Systems With Friction ........................................... F. Tedone and M. Palladino 5651
Secure Control in Partially Observable Environments to Satisfy LTL Specifications ........................................... B. Ramasubramanian, L. Niu, A. Clark, L. Bushnell, and R. Poovendran 5665
Invariance Feedback Entropy of Uncertain Control Systems ........................................... M. S. Tomar, M. Rungger, and M. Zamani 5680
Distributed En trapping Control of Multiagent Systems Using Bearing Measurements ........................................... Z. Yang, C. Chen, S. Zhu, X. Guan, and G. Feng 5696
Almost Sure Resilient Consensus Under Stochastic Interaction: Links Failure and Noisy Channels ........................................... H. Rezaee, T. Parisini, and M. M. Polycarpou 5727
The Nash Equilibrium With Inertia in Population Games ........... B. Gentile, D. Paccagnan, B. Ogunsula, and J. Lygeros 5742
Mean-Nonovershooting Control of Stochastic Nonlinear Systems ........................................... W. Li and M. Krstic 5756
Controlling Human Utilization of Failure-Prone Systems via Taxes ........................................... A. R. Hota and S. Sundaram 5772
System Aliasing in Dynamic Network Reconstruction: Issues on Low Sampling Frequencies ........................................... Z. Yue, J. Thunberg, L. Ljung, Y. Yuan, and J. Gonçalves 5788
Exposure and Revelation Times as a Measure of Opacity in Timed Stochastic Discrete Event Systems ........................................... D. Lefebvre and C. N. Hadjicostis 5802
Chance-Constrained Multilayered Sampling-Based Path Planning for Temporal Logic-Based Missions ........... Y. Oh, K. Cho, Y. Choi, and S. Oh 5816
A Lyapunov-Based Small-Gain Theorem for Infinite Networks ........................................... C. Kawan, A. Mironchenko, A. Swikir, N. Noroozi, and M. Zamani 5830
Geometric Method for Passivation and Cooperative Control of Equilibrium-Independent Passive-Short Systems ........................................... M. Sharf, A. Jain, and D. Zelazo 5877
Controlled Sequential Information Fusion With Social Sensors ........................................... S. Bhatt and V. Krishnamurthy 5893
A Lyapunov Framework for Nested Dynamical Systems on Multiple Time Scales With Application to Converter-Based Power Systems ........................................... I. Subotić, D. Groß, M. Colombino, and F. Dörfler 5909
Finite-Sample Analysis for Decentralized Batch Multiagent Reinforcement Learning With Networked Agents ........................................... K. Zhang, Z. Yang, H. Liu, T. Zhang, and T. Başar 5925
Stochastic Approximation With Iterate-Dependent Markov Noise Under Verifiable Conditions in Compact State Space With the Stability of Iterates Not Ensured ........................................... P. Karmakar and S. Bhatnagar 5941

(Contents Continued on Back Cover)
TECHNICAL NOTES

Active Disturbance Rejection Control for Nonaffined Globally Lipschitz Nonlinear Discrete-Time Systems .................. R. Chi, Y. Hui, B. Huang, and Z. Hou 5955

An Enhanced Observer for Nonlinear Systems With Time-Varying Measurement Delays ........................................ M. Aguado-Rojas, T. B. Hoàng, W. Pasillas-Lépine, A. Loría, and W. Respondek 5968

Impossibility Results for Constrained Control of Stochastic Systems ......................................................... F. Cacace, A. Germani, and C. Manes 5974

Exponential Stabilization of Unstable Bilinear Systems in Finite- and Infinite-Dimensional Spaces ........ M. Ouzahra 5982

Consensus on Matrix-Weighted Switching Networks ........................................................................ L. Pan, H. Shao, M. Mesbahi, Y. Xi, and D. Li 5990

Invariant Manifold-Guided Impulsive Stabilization of Delay Equations ........................................ J. Zhang and E. Fridman 5997

Boundary Control and Observation to Inverse Coefficient Problem for Heat Equation With Unknown Source and Initial Value .................. Z.-X. Zhao, B.-Z. Guo, and Z.-J. Han 6003

In-Domain Stabilization of Block Diagonal Infinite-Dimensional Systems With Time-Varying Input Delays ................................................ H. Lhachemi, C. Prieto, and R. Shorten 6017

Backward Reachability for Polynomial Systems on a Finite Horizon .................................................... H. Yin, M. Arcak, A. Packard, and P. Seiler 6025

State Feedback Stabilization of Large-Scale Logical Control Networks via Network Aggregation ........................................ H. Li, Y. Liu, S. Wang, and B. Niu 6033

A Lyapunov Approach to Robust Regulation of Distributed Port–Hamiltonian Systems .............................................. L. Paunonen, Y. Le Gorrec, and H. Ramirez 6041

A Graph-Based Algorithm for Optimal Control of Switched Systems: An Application to Car Parking ....................... M. Laurini, L. Consolini, and M. Locatelli 6049

Sup-Inf/Inf-Sup Problem on Choice of a Probability Measure by Forward–Backward Stochastic Differential Equation Approach .................................................. T. Saito and A. Takahashi 6056

Optimal Control on Disconnected Sets Using Extreme Point Relaxations and Normality Approximations ................. M. W. Harris 6063

A Switching Observer for a Class of Nonuniformly Observable Systems via Singular Time-Rescaling ......................... M. Aguado-Rojas, T. B. Hoàng, W. Pasillas-Lépine, A. Loría, and W. Respondek 6071

Quantized Feedback Control Based on Spherical Polar Coordinate Quantizer ......................................................... J. Wang 6077

Stability Analysis of Coupled Differential-Difference Systems With Multiple Time-Varying Delays: A Positivity-Based Approach ................................................................. V. De Iulis, A. D’Innocenzo, A. Germani, and C. Manes 6085

Asymptotic Stability of Boolean Networks With Multiple Missing Data .................................................. C. Huang, W. Wang, J. Lu, and J. Kurths 6093

Partial Phase Cohesiveness in Networks of Networks of Kuramoto Oscillators .................................................. Y. Qin, Y. Kawano, O. Portoles, and M. Cao 6100

Observer-Based Fault-Tolerant Spacecraft Attitude Tracking Using Sequential Lyapunov Analyses ......................... H. Gui 6108

Simultaneous Estimation of the State, Unknown Input, and Output Disturbance in Discrete-Time Linear Systems ........ B. Alenezi, M. Zhang, S. Hui, and S. H. Zak 6115

Prescribed-Time Stabilization of a Class of Nonlinear Systems by Linear Time-Varying Feedback ................................ B. Zhou and Y. Shi 6123

Cooperative Learning for Switching Networks With Nonidentical Nonlinear Agents ........................................ D. Meng and J. Zhang 6131

Dynamic Event-Triggered Control of Networked Stochastic Systems With Scheduling Protocols ............................... J. Zhang and E. Fridman 6139

Robust Maximization of Correlated Submodular Functions Under Cardinality and Matroid Constraints ......................... Q. Hou and A. Clark 6148

Nonsmooth Extremum Seeking Control With User-Prescribed Fixed-Time Convergence ................................ J. I. Poveda and M. Krstić 6156

Online Convex Optimization With Binary Constraints ........................................................................ A. Lesage-Landry, J. A. Taylor, and D. S. Callaway 6164

Intersection-Based Decentralized Supervisory Control of Probabilistic Discrete Event Systems ............................. W. Deng, D. Qiu, and J. Yang 6171

Modal Barriers to Controllability in Networks With Linearly Coupled Homogeneous Subsystems ........................... M. Xue and S. Roy 6187

Comments on “Stability Regions of Nonlinear Autonomous Dynamical Systems” ......................................................... M. W. Fisher and I. A. Hiskens 6194

Corrigendum to: “Timescale Separation in Autonomous Optimization” ................................................................. A. Hauswirth, S. Bolognani, G. Hug, and F. Dörfler 6197

2021 INDEX ................................................................ Available online at http://ieeexplore.ieee.org
SURVEY PAPER
Control Oriented Learning in the Era of Big Data ................................................... M. Sznaier 1855

PAPERS
On Analytical Construction of Observable Functions in Extended Dynamic Mode Decomposition for Nonlinear Estimation and Prediction ........................................... M. Netto, Y. Susuki, V. Krishnan, and Y. Zhang 1868
AUV Buoyancy Control With Hard and Soft Actuators ........... C. Zavislak, A. Keow, Z. Chen, and F. Ghorbel 1874
Output Feedback Control for a Nonlinear Optical Interferometry System .... G. Flores, and M. Rakotondrabe 1880
Observability of Discrete-Time LTI Systems Under Unknown Piece-Wise Constant Inputs .......................................................... V. K. Sharma and P. Tallapragada 1886
Tuning Rules for a Class of Passivity-Based Controllers for Mechanical Systems .......................................................... C. Chan-Zheng, P. Borja, and J. M. A. Scherpen 1892
On Numerical Examination of Uniform Ensemble Controllability for Linear Ensemble Systems .......................................................... W. Miao, G. Cheng, and J.-S. Li 1898
Pursuer Coordination in Multi-Player Reach-Avoid Games Through Control Barrier Functions .......................................................... A. Davydov, P. Rivera-Ortiz, and Y. Diaz-Mercado 1910
Exciting Efficient Oscillations in Nonlinear Mechanical Systems Through Eigenmanifold Stabilization ........................................... C. D. Santina and A. Albu-Schaeffer 1916
Online Observer-Based Inverse Reinforcement Learning .......................................................... R. Self, K. Coleman, H. Bai, and R. Kamalapurkar 1922
Finite-Time Controllers for a Class of Planar Nonlinear Systems With Mismatched Disturbances .......................................................... K. Cao, and C. Qian 1928
Adaptive Control of Soft Robots Based on an Enhanced 3D Augmented Rigid Robot Matching .......................................................... M. Trumić, C. D. Santina, K. Jovanović, and A. Fagiolini 1934

IEEE, the stylized IEEE logo, IEEE Control Systems, IEEE Computer Society, and all other trademarks of IEEE are trademarks of The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. "IEEE Control Systems” publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems encourages submissions, both feature articles and columns, on all aspects of control system technology.

SUBMISSION OF MANUSCRIPTS: A feature article typically provides an in-depth treatment of either an application of control technology, a tutorial on some area of control theory, or an innovation in control education.

IEEE Control Systems publishes a variety of columns. "Applications of Control" columns are industrially oriented summaries of innovations in control technology. "Focus on Education" typically describes some aspect of education such as novel control experiments. "Lecture Notes" can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LATEX template can be found at http://www.ieeecss.org/publications/csm/submissions. The specifications in this guide should be followed by all submissions.

All manuscripts should be submitted electronically to the IEEE Control Systems website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content emailed to r.sepulchre@eng.cam.ac.uk.

SPECIAL ISSUES: IEEE Control Systems encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

MISSION STATEMENT AND SCOPE: As the official means of communication for the IEEE Control Systems Society, IEEE Control Systems publishes interesting, useful, and informative material on all aspects of control system technology for the benefit of control educators, practitioners, and researchers. With this mission statement in mind, IEEE Control Systems encourages submissions, both feature articles and columns, on all aspects of control system technology.

Conference on Decision and Control

CDC 2021

December 13–15, Austin, USA

Initial Paper Submissions Due: March 18, 2021 (Passed)

Workshop Proposals Due: May 1, 2021 (Passed)

Decision Notification: Mid-July, 2021

Final Submissions Due: September 30, 2021 (Passed)

https://cdc2021.ieeecss.org/
American Control Conference
ACC 2022
June 8–10, Atlanta, GA, USA

LCSS Option Submission
September 14, 2021 (Passed)

Manuscript Submission
September 28, 2021 (Passed)

Acceptance/Rejection Notice
January 24, 2022

Final Manuscript Submission
March 15, 2022

https://acc2022.a2c2.org/
Conference on Control Technology and Applications
CCTA 2022

August 23–25, Trieste, Italy

Paper Submission Due:
February 1, 2022

Decision Notification:
April 22, 2022

Registration Opens:
Middle of May, 2022

Final Submissions:
Middle of June, 2022

https://ccta2022.ieeecss.org/
Conference on Decision and Control

CDC 2022

December 6–9, Cancun, Mexico
