Scanning the Issue ........................................................................................................ 3083

REGULAR PAPERS
Generalized Sarymsakov Matrices ................................................................. W. Xia, J. Liu, M. Cao, K. H. Johansson, and T. Başar 3085
Convexification of Power Flow Equations in the Presence of Noisy Measurements ............................................................ R. Madani, J. Lavaei, and R. Baldick 3101
Affine Monotonic and Risk-Sensitive Models in Dynamic Programming ................................................................. D. P. Bertsekas 3117
Block Decoupling of Boolean Control Networks ................................................. Y. Yu, J.-e. Feng, J. Pan, and D. Cheng 3129
Balancing Communication and Computation in Distributed Optimization ........................................................................ A. S. Berahas, R. Bollapragada, N. S. Keskar, and E. Wei 3141
Iterative Sequential Action Control for Stable, Model-Based Control of Nonlinear Systems .................................. E. Tzorakoleftherakis and T. D. Murphy 3170
Smooth Interpolation of Covariance Matrices and Brain Network Estimation ................................................................. L. Ning 3184
High-Gain Nonlinear Observer With Lower Tuning Parameter ........................................... A. Zemouche, F. Zhang, F. Mazenc, and R. Rajamani 3194
Multiagent Coordination Via Distributed Pattern Matching ........................................................................... K. Sakurama, S.-I. Azuma, and T. Sugie 3210
Control of a Driftless Bilinear Vector Field on $n$-Sphere ............................................. V. Muralidharan, A. D. Mahindrakar, and A. Saradagi 3226
The Importance of System-Level Information in Multiagent Systems Design: Cardinality and Covering Problems ........................................................................... D. Paccagnan and J. R. Marden 3253
Submodularity of Storage Placement Optimization in Power Networks ........................................................................... J. Qin, I. Yang, and R. Rajagopal 3268
Robustness to In-Domain Viscous Damping of a Collocated Boundary Adaptive Feedback Law for an Antidamped Boundary Wave PDE ........................................................................... C. Roman, D. Bresch-Pietri, C. Priewr, and O. Sename 3284

(Contents Continued on Back Cover)
TECHNICAL NOTES

State Measurement Error-to-State Stability Results Based on Approximate Discrete-Time Models ................. A. J. Vallarelli and H. Haimovich ................................................................. 3308
Distributed Moving-Horizon Estimation With Arrival-Cost Consensus ......................................................... G. Battistelli ................................................................. 3316
Shrinking Horizon Model Predictive Control With Signal Temporal Logic Constraints Under Stochastic Disturbances ................................................................. S. S. Farahani, R. Majumdar, V. S. Prabhu, and S. Soudjani ................................................................. 3324
Polarizability, Consensusability, and Neutralizability of Opinion Dynamics on Cooperative Networks .................. F. Liu, D. Xue, S. Hirche, and M. Buss ................................................................. 3339
Fully Distributed Resilience for Adaptive Exponential Synchronization of Heterogeneous Multiagent Systems Against Actuator Faults ......................................................... C. Chen, K. Xie, F. L. Lewis, S. Xie, and A. Davoudi ................................................................. 3347
Dual Prediction–Correction Methods for Linearly Constrained Time-Varying Convex Programs .................. A. Simonetto ................................................................. 3355
L_2 State Estimation With Guaranteed Convergence Speed in the Presence of Sporadic Measurements ................................................................. F. Ferrante, F. Gouaisbaut, R. G. Sanfelice, and S. Tarbouriech ................................................................. 3362
Descriptor Observers Design for Markov Jump Systems With Simultaneous Sensor and Actuator Faults ................................................................. H. Yang and S. Yin ................................................................. 3370
Stability and L_2 Synthesis of a Class of Periodic Piecewise Time-Varying Systems ................................................................. P. Li, J. Lam, R. Lu, and K.-W. Kwok ................................................................. 3378
Boundary Observers for a Reaction–Diffusion System Under Time-Delayed and Sampled-Data Measurements ................................................................. A. Selivanov and E. Fridman ................................................................. 3385
Controllability and Stabilizability of Networks of Linear Systems ................................................................. J. Trumpf and H. L. Trentelman ................................................................. 3391
Hybrid Pose and Velocity-Bias Estimation on SE(3) Using Inertial and Landmark Measurements ................................................................. M. Wang and A. Tayebi ................................................................. 3399
Convergence Properties for Discrete-Time Nonlinear Systems ................................................................. D. N. Tran, B. S. Rüffer, and C. M. Kellett ................................................................. 3415
A Gradient-Free Three-Dimensional Source Seeking Strategy With Robustness Analysis ................................................................. S. Al-Abri, W. Wu, and F. Zhang ................................................................. 3439
Block Decoupling of Linear Systems by Static-State Feedback ................................................................. V. Kučera ................................................................. 3447
Traffic Models of Periodic Event-Triggered Control Systems ................................................................. A. Fu and M. Mazo Jr ................................................................. 3453
Stabilization Control for Linear Continuous-Time Mean-Field Systems ................................................................. Q. Qi, H. Zhang, and Z. Wu ................................................................. 3461
Backstepping Boundary Control of a Wave PDE With Spatially Distributed Time Invariant Unknown Disturbances ................................................................. H. I. Basturk and I. U. Abyberk ................................................................. 3469
A De Giorgi Iteration-Based Approach for the Establishment of ISS Properties for Burgers’ Equation With Boundary and In-domain Disturbances ................................................................. J. Zheng and G. Zhu ................................................................. 3476
Stabilization of Uncertain Feedforward Nonlinear Systems With Application to Underactuated Systems ................................................................. H. Ye ................................................................. 3484
A Further Result on Semi-global Stabilization of Minimum-Phase Input–Output Linearizable Nonlinear Systems by Linear Partial State Feedback ................................................................. Z. Lin ................................................................. 3492
Finite-Time Adaptive Stabilization of Linear Systems ................................................................. M. K. S. Faradonbeh, A. Tewari, and G. Michailidis ................................................................. 3498
Dimensional-Invariance Principles in Coupled Dynamical Systems: A Unified Analysis and Applications ................................................................. Z. Sun and C. Yu ................................................................. 3514
Finite-Time Cooperative Engagement ................................................................. T. Yucelen, Z. Kan, and E. Pasiliao ................................................................. 3521
40 Impulse Vectors for Input-Shaping Control
A mathematical tool to design and analyze input shapers
CHUL-GOO KANG

56 Phasor-Based Adaptive Control of a Test-Feeder Distribution Network
Application of retrospective cost adaptive control to the IEEE 13-node test feeder
SYED ASEEM UL ISLAM, ELIZABETH L. RATNAM, ANKIT GOEL, and DENNIS S. BERNSTEIN

A feature article typically provides an in-depth treatment of either an application of control technology, or an innovation in control education. IEEE Control Systems Magazine publishes a variety of columns. "Applications of Control" columns are industrially oriented summaries of innovations in control technology. "Focus on Education" typically describes some aspect of education such as novel control experiments. "Lecture Notes" can be theoretical in nature as long as they have clear tutorial value and intent. See recent issues for examples of these and other types of columns. Authors are encouraged to contact the editor-in-chief about the suitability of potential columns.

A detailed Author’s Guide, a sample formatted manuscript, and LaTeX template can be found at http://www.ieeeccss.org/publications/cms/submissions. The specifications in this guide should be followed by all submissions. All manuscripts should be submitted electronically to the IEEE Control Systems Magazine website, https://css.paperplaza.net/conferences/scripts/start.pl, with inquiries on appropriateness of content emailed to jhow@mit.edu.

SPECIAL ISSUES: IEEE Control Systems Magazine encourages proposals for special issues. Proposers are encouraged to contact the editor-in-chief to discuss potential topics.

BOOKS AND CONFERENCES: Submit information about past and future conferences to the corresponding editor for conferences.

ADVERTISING: IEEE Control Systems Magazine accepts advertising for educational products, books, software, conferences, employment, and control-related technology. For information about advertising, contact Mark David, m.david@ieee.org, +1 732 465 6473.
Conference on
Control Technology and Applications
CCTA 2019
August 19–21, Hong Kong, China

Invited Session Proposals Due:
January 19, 2019 (Passed)

Contributed and Invited Papers’ Submissions Due:
January 19, 2019 (Passed)

Notification of Acceptance/Rejection:
April 19, 2019

Deadline for final submission of all papers:
May 19, 2019 (Passed)

http://ccta2019.ieeecss.org/
Conférence sur la Décision et le Contrôle

CDC 2019

Décembre 11–13, Nice, France

Propositions de Sessions Invitées :
Marche 7, 2019 (Passé)

Propositions d'Éléments de Travail :
May 2, 2019 (Passé)

Notifications de Décision des Éléments de Travail et des Conférences :
Mid-July, 2019

Papiers Acceptés :
September 10, 2019

http://cdc2019.ieeecss.org/
American Control Conference
ACC 2020

July 1–3, Denver, Colorado, USA

Paper Submission Deadline:
September 23, 2019

Acceptance/Rejection Notice:
January 31, 2020

Final Manuscript Submission:
March 15, 2020

http://acc2020.a2c2.org/
Conference on
Control Technology and Applications
CCTA 2020
August 24–26, Montreal, Canada

Initial Submission Deadline:
October 27, 2019

Notification of Acceptance/Rejection:
April 26, 2020

Final Submission Due Date:
May 21, 2020

http://ccta2020.ieeecss.org/
